

STANDARD BOARD PAPER FOR HEALTHY MINDS BOARD MEETINGS

Title: Quality for Health

Agenda Item No.: 7d

Prepared by: Dianne

Date: 29th November 2019

Purpose of the Paper: To establish where we are with Q4H and establish action plan

Background:

Quality for Health is a quality assurance system for voluntary organisations delivering health services developed by Calderdale CCG and VAC

Relevant Information:

We are working on Level 2 of Q4H. It involves addressing 9 quality areas by producing evidence for a range of indicators and producing a case study for each area. This is then submitted via on-line portal and reviewed by an assessor. The assessor then visits the organisation and meets with a range of staff, trustees and people involved in the service in order to make the full assessment.

We have already requested a second year to complete the work.

I have met with Tamsin Woodhead (VAC) who is Q4H Lead.

We have agreed to meet in mid-January 2020 to input the material onto the online portal, and submit.

I believe the whole process would then be completed by March 2020

I believe that this timescale is achievable. However, I will need active support from a trustee in order to complete the section on Governance.

Finance:

None

Next Steps: Agree Board Support

Recommendation:
